From Sara Balla's iPhone to Everyone: 10:11 AM

Is it possible for the County Public Health department to update their guidance and publish it to match the State's new guidance?

From Destiny Malone to Everyone: 10:11 AM

We still need to operate in non mingling cohorts, correct? Just no capacity cap other than licensing requirements?

From Megan Baroni to Everyone: 10:12 AM

Do we still need to practice special sanitizing guidelines?

From Tricia Pastor-Cabrillo College to Everyone: 10:12 AM

Will masks still be mandatory for all kids at all levels?

From Sara Balla's iPhone to Everyone: 10:13 AM

Masks for kids outside?

From Destiny Malone to Everyone: 10:13 AM

Do we still need to keep the same providers per group? Or can we share teachers within groups

From Donna Cherie to Everyone: 10:14 AM

To clarify, normal capacity means our licensing limit, correct? We are waiting for licensing to make that declaration.

From iPhonekristen to Everyone: 10:15 AM

From Megan Baroni to Everyone: 10:24 AM

We don't use any plexiglass

From Nora Caruso to Everyone: 10:25 AM

Research shows that the most important mitigation factor is ventilation. The more windows/doors open the better. Important to keep in mind as we loosen up cohort restrictions

From Erendira Guerrero to Everyone: 10:25 AM

Nora you are correct.

From Larry Drury to Everyone: 10:26 AM

Thank you Nora!! very good point!!

From Angelica_Renteria to Everyone: 10:27 AM

If you have seen anything in writing about the use of barriers or plexiglass as mitigation factors with preschool children, we will appreciate the info, thanks

From Stacey Reynolds to Everyone: 10:27 AM

Tricia, I would appreciate seeing your policy

From Nora Caruso to Everyone: 10:27 AM

plexiglass was more relevant when we thought the virus was carried by droplets, not aerosols

From Megan Baroni to Everyone: 10:28 AM

Because of the way the virus is passed, I question the need to "sanitize" outside play equipment...

From Stephanie Simmons to Everyone: 10:29 AM

We replaced one set just a couple of weeks ago. Being outside in the cold can affect the temperature.

From Amy Rather to Everyone: 10:30 AM

they are inconsistent

From Troylene Valenzuela to Everyone: 10:31 AM

Tricia, can you send me a copy of your health policy? tval2@sbcglobal.net

From Stephanie Simmons to Everyone: 10:31 AM

They say the temperature is not really the problem, it is the other symptoms
