Hi All and Diane, I am attending from PH today, and can give a little update if there is time, or answer some questions if there are some. I'm here as we know there is a lot of transmission in the community, and we have been answering more calls from childcare/daycare providers. My camera is unfortunately not working, however. Thanks, Diana from PH

Here are the types of filters you can use: HVAC systems in buildings with them, fitted with MERV-13 filters. Portable Air Cleaners (HEPA filters) and Corsi-Rosenthal boxes. Please go to cleanaircrew.org for more info, or reach out to me directly if you want more information about clean air resources. And Maria, it sounds like you might want to consider consulting with Jennifer Buesing, Dir of School Safety, regarding how to make your 30-person training safer. COE is absolutely urging all trainings that can be to be conducted either outside or virtually at this time, due to outbreaks in the last 2 weeks or so that have resulted from large staff gatherings that were conducted in-person and indoors. We really encourage having people being asked to test the morning of the training, and only those who test negative can then attend. Even then, there has been spread, which is why holding the training outdoors is safer, and virtual/remote is the safest of all.
