So hypothetically speaking parents could look up whether or not their caregiver was vaccinated if they had the name and bday of the provider?

From Leslie Telles to Everyone: 10:24 AM

Sorry if I missed this but when you say once in doors everyone should be masked up, does this include children. Are children 2 years and younger exempt?

From Rocio to Everyone: 10:24 AM

Can you remind us of the website where we can look up vaccine status?

From Me to Everyone: 10:25 AM

We will add the website in the chat soon.

Are you going to be monitoring symptoms each morning for kids in the fall? or asking parents to do it at home?

From Larry Drury to Everyone: 10:40 AM

Yes!!! thank you so much for this document....so very useful for us all.

From Erendira Guerrero to Everyone: 10:42 AM

At Head Start we will continue to do it at the centers as part of our daily health check at check in.

From Amy Warren to Everyone: 10:43 AM

We are doing both. In the past with normal illness it has been proven that not all parents are forthcoming with honest answers. Unfortunately..

FCCH as well?

From Erendira Guerrero to Everyone: 10:43 AM

Risk assessment or Negative TB test

From Nora Caruso (she/her) to Everyone: 10:43 AM

We do daily health checks anyway.. always have... but I'm not sure we will be doing temperature checks. I believe the research has proved that to be not an effective screening method.

From Suzanne to Everyone: 10:47 AM

Do children have to wear masks outside during recess?

From Amy Warren to Everyone: 10:48 AM

chronic

From Nora Caruso (she/her) to Everyone: 10:51 AM

I have a form we send with parents that asks specific questions to the medical provider. We send it with our parents anytime we send someone home. We also make it clear that our health guidelines may be stricter than those recommended than the doctor.

From Amy Warren to Everyone: 10:53 AM

I would love your form Nora!
